Statement of Work — Joint Development Project: Claude Integration and Automation for Deutsch Lernen

12 October 2026 · Prepared by TechLegion

1. Parties

This Statement of Work is entered into between:

TechLegion, Postfach 7414, 6302 Zug, Switzerland, represented by Tamara Koliada, Managing Director
(the **"Provider"**)

and

Ralchenko Software, UID CHE-339.158.493, registered in the Commercial Register of the Canton of Zurich, Bubentalstrasse 8, 8304 Wallisellen, Switzerland, represented by Viktor Ralchenko, CEO and Founder, viktor@ralchenko.ch
(the **"Customer"**)

The Provider and the Customer are each a "Party" and together the "Parties".

Customer's Anthropic Organization ID: 10fad92e-a740-4486-8634-30ca04991f12.

2. Project summary

Engagement type	Joint Development Project, pro bono
Primary service type	Test collaboration and implementation of Claude products
Secondary service type	Customer-facing AI product build
Delivery model	Pilot / proof of concept
Customer use case	Education and learning
Claude products used	Claude Code and the Claude API
Product	Deutsch Lernen (Android), live on Google Play: play.google.com/store/apps/details?id=com.germantutor
Term	May – 30 November 2026

3. Background and purpose

Deutsch Lernen is an Android app on Google Play that teaches German from A1 to C2 with an AI tutor. Since May 2026 TechLegion has advised Ralchenko Software and helped implement the integration of Claude in the app, through monthly one-to-one sessions on the tutor design and model choice, testing and integration. As a result, Claude was added to the app as an AI provider for the tutor in September 2026.

The engagement now continues as a joint development project: the parties automate more of the learning flow with Claude and measure the result against agreed KPIs. It is run pro bono as a test collaboration, so that both parties can validate how Claude products are implemented in a live, customer-facing education product.

This SOW is signed on the date shown in section 9. Phase 1 describes work already performed before signature.

4. Phased rollout plan

Phase 1 — Research and automation discovery (May – September 2026, completed)

- Monthly one-to-one sessions between Tamara Koliada and Viktor Ralchenko on the AI tutor design and the choice of model.
- Testing and integration support for Claude in Deutsch Lernen.
- Monthly TechLegion community evening meetups attended by the Customer.
- Outcome: Claude integrated as the tutor's AI provider (September 2026).

Phase 2 — Automation proposal and KPIs (13 – 31 October 2026)

- Agree which tasks Claude automates: exercise generation, checking of learners' answers, AI tutor explanations.
- Define the KPIs and measure their baseline (see section 5).
- Cost control: model choice and prompt caching.
- Safety for users under 18.

Phase 3 — Implementation and closing (1 – 30 November 2026)

- TechLegion and Ralchenko Software jointly implement the agreed automation, using Claude Code and the Claude API.
- Final measurement of the KPIs against the baseline; final KPI report on 30 November 2026.

5. KPIs (to be confirmed in Phase 2)

- AI cost per monthly active user.
- Share of learners' answers checked automatically.
- AI tutor answer quality on a fixed evaluation set.
- Active devices and installs on Google Play.

6. Deliverables

Deliverable	Owner	Due
Phase 1 summary: advice given and resulting changes (1 page)	Provider	16 Oct 2026
Automation proposal with KPI definitions and baseline	Provider	31 Oct 2026
Implemented automation in Deutsch Lernen	Provider and Customer	23 Nov 2026
Final report: KPI results against baseline	Provider and Customer	30 Nov 2026

Acceptance: the Customer confirms each deliverable by e-mail within 5 working days.

7. Fees and responsibilities

This is a pro bono engagement. The fee is CHF 0 and no expenses are reimbursed. Each party bears its own costs, including its own Claude subscriptions and API usage.

Provider: assigns the work to Tamara Koliada; delivers the documents above on time; co-develops the automation in Phase 3.

Customer: gives access to the relevant source code and documentation by 13 October 2026; co-develops the automation in Phase 3 and decides on releases to Google Play; shares KPI data.

8. Confidentiality, IP and governing law

- **Confidentiality:** the Provider keeps the Customer's source code, API keys and documentation confidential and uses them only for this work.
- **Data protection:** no personal data of app users is shared with the Provider; KPI data is shared in aggregated form only.
- **Intellectual property:** the Customer keeps all rights to its code and app; deliverables and code produced in this project become the Customer's property. Each party keeps its general know-how.
- **Publicity:** either party may state that TechLegion and Ralchenko Software worked together on this project, including in a customer story submitted to Anthropic.
- **Liability:** the work is free of charge and without warranty; liability is excluded to the extent permitted by Swiss law (Art. 100 CO), except for intent and gross negligence.
- **Termination:** either party may end this SOW at any time by e-mail.
- **Governing law:** Swiss law. Place of jurisdiction: Zurich.
